-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

1)  Responsive to communication(s) filed on 11 September 2007.

2a)  This action is **FINAL**.                            2b)  This action is non-final.

3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

**DETAILED ACTION**

1. In view of the remarks filed on September 11, 2007, PROSECUTION IS HEREBY REOPENED. as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 27-40 rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001301437 (JP '437).

As discussed previously, it is unclear to the examiner which embodiment applicant's believe their claims read on figures 3 and 4, or figure 5. If the applicant believes the claims read upon figure 5, the following rejection is made:

4. Claims 27-40 rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP '437.

See figures 4 and 6 and note the polygonal portions 20b and semi-circular portions 20a.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 27-40 rejected under 35 U.S.C. 103(a) as being unpatentable over JP 10193944 (JP '944) in view of Sugita et al. '381.

Regarding claims 27-40 JP '944 shows in figure 3 a collar for a stabilizer bar but lacks a showing of the first and second inner polygonal portions formed adjacent to the first and second clipped ends.

Sugita et al. '381 is relied upon to show it is notoriously well known in the art to provide the inner perimeter portions of the collar with projections as shown at 22 to prevent slippage. Although not applied, also see the ribs of 5 in Domer.

It would have been obvious to the ordinary skilled worker in the art at the time of the invention to have provided the inner semi-circular perimeter portions of JP '944 with

projections, as shown at 22 in Sugita et al., so that the collar of JP '944 may be used with different stabilizer bar configurations. Note that providing the collar with these type of projections would then meet the claimed limitations, discussed above.

***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 571-272-7123. The examiner can normally be reached on M-F 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rob Siconolfi can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
